

The 'Patient Empowerment Program'

Podcast

Empowering patients and their families with knowledge through interviews and an Intro to Medical Science series that provides a master class in basic science and how its related to drug discovery and development

"JOIN OUR NANO-RARE COMMUNITY!"
Episodes Released Every Other Wednesday

HOSTED BY DR. STANLEY CROOKE

The podcast is hosted by Dr. Stanley Crooke, a scientist, physician, entrepreneur and the father of antisense technology. Dr. Crooke is responsible for driving the development of antisense or ASO technology, an RNA-targeted technology responsible for the commercialization of three first-in class medicines and more than 40 drugs currently in development. In 2020, Stan formed n-Lorem to use this powerful technology to develop personalized ASO medicines for nano-rare patients (1 to 30 patients worldwide) - for free, for life
